

Muhammad Talha Safdar

Full Stack JavaScript/TypeScript Developer | Angular | React | Node.js

Lahore, Pakistan | talhamalik4147@gmail.com | +92 300 487 9333

Portfolio: <https://talha5131.github.io/> | GitHub: <https://github.com/talha5131> | LinkedIn: <https://www.linkedin.com/in/talha5131/>

PROFESSIONAL SUMMARY

Full Stack JavaScript/TypeScript Developer with 6+ years of experience building responsive, scalable, and production-ready web applications across frontend, backend/API, and full-stack JavaScript workflows. Strong hands-on experience with Angular, React, Node.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Angular Material, Material UI, REST APIs, GraphQL APIs, Firebase, Firestore, authentication workflows, JSON payload handling, and API-integrated features. Experienced in enterprise dashboards, ERP/CRM-style systems, admin panels, PDF signature interfaces, reusable UI components, role-based workflows, validation, debugging, performance optimization, and clean component-based architecture.

TECHNICAL PROFICIENCIES

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend Development: Angular, React, RxJS, Angular Forms, Reactive Forms, Angular Routing, Angular Services, Guards, Pipes, Directives, Lazy Loading, Angular CLI, React Components, Hooks, State Handling, Single Page Applications

UI Frameworks & Styling: Bootstrap, Angular Material, Material UI, jQuery, Responsive Design, Mobile-Friendly Layouts, Admin Dashboards, ERP Interfaces, CRM Interfaces, Form Validation

Backend & Full-Stack: Node.js, Server-Side JavaScript, REST API Development/Integration, JSON, API Contracts, Request/Response Handling, Validation Logic, Error Handling, Authentication Workflows, Firebase, Firestore, npm

API & Data Workflows: REST APIs, GraphQL APIs, CRUD Workflows, Data Fetching, Data Updating, Search, Filtering, Loading States, Error States, Real-Time Application Features

Tools & Workflow: Git, GitHub, Bitbucket, VS Code, Postman, Chrome DevTools, Jira, Debugging, Production Bug Fixing, Code Maintainability

Additional Technologies: Mapbox, GeoJSON, Lodash, Moment.js, PDF Signature Interfaces, PDF Export Workflows, OpenCart, Laravel-Based Templates

WORK EXPERIENCE

Senior Software Engineer - Angular Developer | Ascertia (Pvt) Ltd, Lahore

Sept 2022 to Present

Worked on ADSS Server, an enterprise-grade administration and access management system used for configuring, managing, and monitoring secure digital service workflows.

- Developed and maintained Angular-based admin modules for ADSS Server, including access management, configuration workflows, enterprise administration screens, and PDF digital signature features.
- Designed and implemented frontend interfaces for PDF signature appearance and placement workflows, including configuration screens, form-based inputs, validation handling, status views, and API-integrated user actions.
- Built responsive UI screens using Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, and Angular Material.
- Created reusable frontend components including forms, tables, filters, modals, dropdowns, validation controls, detail views, and dashboard-style interfaces to improve maintainability.
- Integrated REST APIs for fetching, displaying, updating, and validating system-level configuration and PDF signing-related data.
- Implemented role-based UI behavior to show, hide, or restrict actions based on user permissions and workflow requirements.
- Collaborated with backend teams on API contracts, payload structures, validation rules, and backend service integration points where required.
- Fixed frontend bugs, layout issues, validation problems, and API integration defects across multiple production modules.

Angular Developer | Intellicode, Lahore

Dec 2021 to Sept 2022

Worked on Algoras ERP, a business management system designed to handle internal operations, records, workflows, and administrative processes.

- Developed and maintained ERP modules using Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, and Angular Material.
- Built business workflow screens for managing records, forms, user actions, reports, administrative data, and internal business processes.
- Created reusable UI components for dynamic forms, data tables, modals, filters, dropdowns, and detail pages.
- Integrated REST APIs to support data creation, updates, search, filtering, validation, and error handling.
- Improved frontend maintainability by organizing screens into modular Angular components, services, and reusable UI patterns.
- Collaborated with backend developers and QA teams to resolve API issues, UI bugs, and workflow defects.

Full-Stack JavaScript Developer | VEDevelopers, Lahore

Jan 2020 to Dec 2021

Worked as a Full-Stack JavaScript Developer, building responsive web application interfaces and supporting complete application workflows using JavaScript technologies.

- Developed responsive frontend screens using HTML5, CSS3, JavaScript, Bootstrap, Angular, React.js, and jQuery.
- Worked on business web applications including CRM-style and ERP-style interfaces, admin panels, forms, dashboards, and user-facing modules.
- Integrated frontend applications with APIs and Firebase-based workflows, including authentication, data handling, and real-time application features where required.
- Contributed to full-stack JavaScript workflows using Node.js, Firebase, API integrations, and frontend application logic to support end-to-end feature delivery.
- Improved UI layouts, fixed bugs, enhanced responsiveness, and helped deliver clean, usable, and business-ready web application features.
- Collaborated across frontend and backend tasks to convert business requirements into working application screens, workflows, and API-connected features.

Front-End Developer | Freelancer, Lahore

Jul 2019 to Dec 2019

Worked as a freelance Front-End UI/UX Developer on web application interfaces and business website features.

- Built frontend screens using HTML5, CSS3, Bootstrap 3 and 4, JavaScript, Laravel-based templates, Angular, and OpenCart applications.
- Implemented layout fixes, responsive behavior, and UI improvements for client-facing web pages.

UI/UX Intern | Encapsulate Technologies, Lahore

Mar 2019 to Aug 2019

Worked on HTML, CSS, Bootstrap, and JavaScript to build and improve responsive user interfaces.

SELECTED FULL-STACK & JAVASCRIPT PROJECT HIGHLIGHTS

ADSS Server / PDF Signature Workflows: Developed Angular-based enterprise administration screens and PDF signature workflow interfaces, including signature appearance and placement configuration, validation handling, status views, role-based actions, and REST API-integrated user flows.

Algoras ERP: Built Angular-based ERP modules for business workflows, records management, dynamic forms, data tables, filters, validation flows, administrative actions, and API-integrated screens.

React QA / Translation Dashboard: Built React and Material UI dashboard features for translation workflows, grouped data views, editable table fields, role-based actions, GraphQL API integration, and real-time workflow updates.

Firebase & API-Based Web Workflows: Supported API-connected and Firebase-based application features including authentication workflows, data handling, real-time updates, and full-stack JavaScript feature delivery where required.

RELEVANT TRAINING

- NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) - Udemy
- Hands-on JavaScript/TypeScript development across Angular, React, Node.js, REST APIs, GraphQL APIs, Firebase, and business web application workflows.

EDUCATION

University of South Asia, Lahore

BS Computer Science (BSCS), 2015 to 2019
Graduated with 3.0 CGPA.

Garrison Degree College, Lahore

F.Sc. Pre-Engineering, 2011 to 2013
Completed Intermediate in Pre-Engineering with 70% marks.

Garrison Boys High School, Lahore

Matriculation, 2009 to 2011
Completed Matriculation with Computer Sciences and achieved 84% marks.
